

**University of Pittsburgh  
School of Medicine**

**The Sixth Annual A. Julio Martinez Memorial Lecture**

**GUEST SPEAKER**

**Arie Perry, MD**

Professor of Pathology & Neurological Surgery  
Director, Neuropathology & Vice Chair of Pathology  
University of California, San Francisco  
San Francisco, CA

***“Molecular Diagnostics of Gliomas”***

**Wednesday, September 29, 2010**

12:00 – 1:00 p.m.

Room 1104

UPMC Presbyterian Hospital  
11<sup>th</sup> Floor Scaife Conference Center  
200 Lothrop Street,  
Pittsburgh, PA

Dr. Arie Perry is a Professor of Pathology and Neurological Surgery at the University of California in San Francisco. There, he also serves as the Director of the Neuropathology Division. He received his MD and Anatomic Pathology/Clinical Pathology residency training at the U. of Texas Southwestern Medical Center in Dallas, TX, followed by fellowships in surgical pathology, neuropathology, and molecular cytogenetics research at the Mayo Clinic in Rochester, MN. Both his clinical practice and translational research focus on classification, grading, and molecular characterization of brain tumors. He has focused on a wide array of adult and pediatric tumor types, but his most notable contributions relate to oligodendroglial neoplasms, glioblastoma variants, and meningiomas. He also serves as the chief editor for Brain Pathology (the official journal for the International Society of Neuropathology). Dr. Perry has published over 240 research papers, reviews, and book chapters, has won numerous teaching awards, maintains an active surgical neuropathology consult service, and is a frequently invited speaker on topics of brain tumor pathology and genetics. He has also been featured in several media stories for his use of "neuropathology songs" as an educational tool for second year medical students.
